# COUNCIL ACTS TO IMPROVE CITY WATER SYSTEM

## Filtration, Softening Plant To Be Added By Sale Of Revenue Bonds

PRINCETON LEADS STATE IN CAMPAIGN FOR SCRAP METAL

Butler High School's chapter, Future Farmers of America, was unofficially reported Wednesday to be in first place in Kentucky in the scrap metal campaign now being conducted. The campaign has been continued in this community another week and the members of the chapter hope to collect several thousand more pounds of vitally needed metal, James D. Maddox, agricultural teacher at Butler, said.

Christmas decorations and their extent, for Princeton's business district, will be discussed and store hours for the pre-Christmas shopping period will be decided upon.

The executive committee of the association met Tuesday afternoon to hear a proposal for publication of a new city directory for Princeton but the agent, who was here Monday and asked for the hearing, failed to appear.

Butler's defense was weak against Murray, and in the initial quarter, the hosts chalked up seven points after a 92-yard march to the goal. Jeffrey, of Murray, went over from the four and kicked the extra point.

In the second quarter, a 52-yard run, plus a quarterback sneak from the one, gave Murray a 19-0 advantage. In the third Miller climaxed a 65-yard drive to score. Miller kicked the extra point.

Butler High's Tigers met their fourth consecutive defeat of the season, tallying two wins and two ties at the fall season opener, after which Lady Luck turned her back on what had appeared to be a successful year.

Butler High School's music-makers won first place Thursday in competition at the Armistice Day program in Paducah. Sponsored by the American Legion, the band defeated Trigg County High's marching players for top honors before a crowd of 1,500 people. The band displayed snappy drilling, fine music and expert training under the directorship of K. V. Bryant. Paducah's Tilghman high school band performed but did not compete for prize money. The two bands marched earlier in the day, while two other aggregations in the downtown program—Ft. Knox and Lincoln high of Paducah—did not enter the competition. The exhibition was at Keller Field.

The Joy Class of the First Christian Church will sponsor a rummage sale in the basement of the Elks' building Saturday, Nov. 20. Proceeds will be used for decorating their Sunday School room and for a Christmas project.

## Scrap Campaign Extended Week

Future Farmers To Collect Metal Saturday In City

The Mid-West scrap drive has been extended another week, through Saturday, Nov. 20, James D. Maddox, agriculture instructor at Butler High School, said Tuesday. The drive is sponsored locally by Butler Chapter, Future Farmers of America.

Last Saturday the boys collected 5,698 pounds of metal, which sold for \$65.32. This amount was donated to the chapter, and is in addition to amounts turned in to dealers and the poundage credited to the chapter's collecting efforts.

Another drive will be launched Saturday, when a truck will pick up any scrap metal a person has on his place. The chapter has shown appreciation for the cooperation received in the drive, and urges all who have scrap to point it out to the young farmers, or place it where the truck can load it.

## Safe And Contents Taken From Ideal Food Market

A 600 pound safe, with its contents, was taken from the Ideal Food Market, 307 E. Main, sometime Tuesday night, it was reported Wednesday. The safe was rolled to the front door, where traces of it end. Entrance was made by forcing the front doors.

## The New Malthusians

Agricultural scientists are discounting the writings of some modern prophets of gloom who are capitalizing on a debunked theory of the late Thomas Robert Malthus that the world's population will soon outgrow its food supply.

The new Malthusians are insisting that soil is losing its fertility through erosion and reckless exploitation and that food production will decline in the face of a rapidly increasing world population. They are implying that Malthus, who died in 1834, was just a bit premature in his predictions.

Improved farming methods, opening of new farming areas and modern transportation methods—things not foreseen by Malthus—have served to meet the world's food needs, although the population has doubled since the time of Malthus. All the while, old lands have become more productive.

Further use of the world's land resources and new ways of producing food in the future no doubt will prove the new Malthusians wrong, too. In fact, so our soil experts say, present-day American farming methods, if extended to other tillable areas of the world, could result

in a doubling of the world's food supply. Further improvement in production methods that would make land more productive could be expected to add to this doubling of the world's food potential.

Scarcely engendered by the New Malthusians, some of whose writings are on the best-selling lists, can serve a useful purpose in propagandizing the need for better farm and soil-saving practices throughout the world. There is always reason for being scared by the destructive possibilities of soil erosion.

In fact, the doomsday prophets' predictions would be a little bit more bright if they had pointed out that erosion eventually might wear down the earth's ground area to below sea level. Then the earth would be covered by a film of water a mile or so deep. Nations would be required to feed their floating populations with food produced from water rather than from the soil. It would require a few quintillion years, perhaps, but it might not be so bad; this idea of every man being seafarer all the time. Anyway, the theory holds a lot more water than the Malthusian prophecies.

(Lexington Herald)

## Democratic Party Doesn't Need Wallace

Most Democrats will find themselves in sympathy with National Chairman J. Howard McGrath who indicated Wednesday that Henry A. Wallace will "find the welcome mat gone" if he undertakes to return to the Democratic party.

"So far as I am concerned," said McGrath, "Henry Wallace has taken himself out of the Democratic party and he can stay out."

The foregoing statement probably has been echoed repeatedly by Democrats the country over. Wallace certainly committed political suicide when he ran out on his party.

Many people undoubtedly will witness the political demise of the Iowan with something akin to a pang of regret. The former vice-president made an important contribution to his party and the nation prior to 1944 both as agriculture secretary and vice president in the administration of the last President Roosevelt. In the early part of the New Deal he had a part in formulating the farm program and other liberal legislation.

He also did a creditable job as secretary of commerce in the Roosevelt-Truman administration until the split with President Truman over foreign policies, a field Wallace invaded apparently at the behest of no one in authority.

Wallace's motive in organizing the Progressive party and entering the campaign for the presidency was clear from

the beginning. Even a person with so little political foresight as he could not have felt that his party had an outside chance to win. He was out to beat Truman and the Democratic party apparently with the idea that he might be able to assume a strategic position in the post-election era of reorganization.

He did succeed in costing the Truman-Barkley ticket New York's 47 electoral votes, his 500,000 votes in the Empire state being sufficient to throw the state to Dewey. But happily, this was not enough to swing the election. Now Wallace and his party, which was made up of Communists and a queer collection of political misfits are where they should be—out in the cold.

About the only feeling the country as a whole has toward Wallace at the moment is one of relief that the late President Roosevelt saw fit to junk him in the 1944 convention. When Mr. Roosevelt took President Truman as his running mate in that convention and shunted Wallace aside, there was no little disappointment among the Democratic rank and file. Wallace had not been an unpopular vice president and a great many people felt that he should be permitted to continue as the running-mate of the President. But Roosevelt apparently knew Wallace better than many of the latter's admirers. (Owensboro Messenger)

## The Commonwealth Remains

The great fact that comes from the two weeks' conference in London of the Prime Ministers of states representing 500,000,000 persons who still swear allegiance to the British Crown is that the Commonwealth remains. It not only remains; it emerges from the conference stronger, if anything, than it was before. The prediction that this conference would mark its twilight are confounded. It is to be more flexible, it is true. There is to be room within it for regional alliances such as that of the United Kingdom with Western Europe; of Canada, perhaps, with the Pan American Union. India may declare itself a republic and forswear allegiance to the Crown, as may also Pakistan and Ceylon. But all remain, as the final communique said, with a "substantial community of outlook", dedicated individually and collectively to support of the objectives of the United Nations, to opposition to aggression, to the furtherance of world peace.

There were no captains and no kings at 10 Downing Street for this meeting. There met only men in muff, the democratically elected heads of states who, despite differences of race, of religion, of custom, still were "members of a family," as they themselves expressed it. No treaties were signed. No firm agreements were reached, nor even discussed. They merely joined together for two weeks to talk over their problems, as members of a family do, and to come out with a common understanding of each other's ideas and plans. In a period of name-calling the conference was a refreshing affirmation of the proposition that there are no unsolvable problems among men of good-will.

To fully appreciate the significance of this conference—carried on, all were agreed, in an atmosphere of the utmost friendliness—it is well to remember that

in London were represented a quarter of the world's people and a quarter of its area. They represented every continent—Europe, Africa, Asia, Australia, North and South America. They represented, too, a group of states that has moved more swiftly toward the goal of democratic freedoms than has any other. Ten years ago the United Kingdom and the Dominions made up only 56.1 percent of the areas and people under the British Crown. Colonies accounted for 37.4 percent of the remainder and mandates 6.5 percent. Now the percentages are 69.9 percent for the United Kingdom and the Dominions, 23.8 percent for colonies and 6.3 percent for mandates. Since the last conference in 1946, India, Pakistan and Ceylon have been freed. Burma has been granted her independence. The mandate over Palestine has been relinquished. No new territory has been added.

It remains to be seen what further changes the years will bring in the world's most unique political structure. Many internal strains remain to be lessened. But often the ties that bind most loosely are the strongest. That would seem to be the lesson for the world in the results of the Commonwealth Conference.

(New York Times)

The United States has about 461,000,000 acres of commercial forest land. Every day there are 1,690 fires in the U. S. on the average.

Jefferson Davis, later president of the Confederacy, encouraged the importation of camels in the United States in 1855 when he was secretary of war.

The New York Central railroad was formed by the merger of 10 lines in 1853. Earthquakes in Alaska 50 years ago caused some sections of the coast to rise as much as 50 feet.

Pennyrile Postscripts  
By G.M.P.

Sometimes when I have just turned away another proffered printing job I feel like the housewife who wanted to know how long this burdensome prosperity is gonna last.

I am 16 myself and would like to correspond with a boy or girl that age or older, but not younger, writes Alleen Batten, of 18 Avondale Avenue, Neasden, London, N. W. 2. She says the reason she wrote The Leader editor about this "I just fancied the name (Princeton) in the map and took a chance". Will somebody "fancy" Alleen?

Marion P. Brown says the reason the Truman-Barkley ticket did so well in those western states is that he made a trip out there not long ago and explained to the farmers... "and our side carried every state I was in except South Dakota".

And, one of my sorrowing Republican friends came through with the helpful sentiment, when he had digested the election returns: Well, I have always managed to get three pretty good meals a day, throughout the New Deal's 16 years.

Americans love the underdog and hence, rejoiced when Truman sprang his big upset; but all of us love a good loser too... and Tom Dewey is certainly tops in this. He is among the foremost of men who could smile when everything went dead wrong in our lexicon of good sportsmen. And a smart feller remarked right after the election: Don't waste your sympathy on the losers. They are fortunate... they didn't get those hard, thankless jobs.

Kelsie Tudor is the quietest, most unassuming auctioneer I have ever had experience with. He is doing right well for himself in this field of endeavor; and deservedly so.

Princeton's downtown section should have Christmas lights this year. After a lapse of several years, to save electricity during the war, the holiday season ought to be helped along and Santa Claus' assistants should be stimulated and cheered, by decorations like we formerly had. Princeton merchants compete with those of other cities and towns more at Christmas shopping time than in normal periods... and most neighboring towns will light and decorate their business districts for the Yuletide.

The Boss Lady at our house has a large basket of the finest lemons we ever saw. She got 'em from a friend in Texas, who formerly sent oranges. The lemons are as large as small oranges, have a very thin rind... and yield a great deal of excellent juice. So now all us mere males are drinking hot lemonade mornings and nights, without sugar... to keep off colds!

The current issue of KT Notes, Kiwanis District booklet, has a fine picture of Ken Johnston, new lieutenant governor for this district... and says he is K. A. Thompson, of Mexico, Ky. Ken says he frequently sees his name misspelled, by leaving out the "t", but this is the first time it has been completely changed for him, in print.

Jim Pickens, Princeton's gift to Western, won all the marbles, the headlines and the homecoming game for the Hilltoppers last Saturday when Western defeated Eastern 14 to 13... on Jim's forward passing and quarterbacking. He intercepted four or five Eastern passes, to save touchdowns and is Mister Pickens on the college campus now.

## Did You Know?

The term "filibusters" was first applied to pirates and later to citizens of the United States who intervened without government sanction in favor of Latin American revolutions against Spain.

Some fashion experts suggest that men wear red-blue-green neckties with gray suits, red-brown-green for brown suits and red-blue-gray-yellow with blue suits.

Good steam engines convert about 10 percent of energy fed into them to power; good gasoline engines, 20 percent; good diesel engines 40 percent.

The fluvous duck, named for its reddish-yellow coloring, is a night feeder, and consequently very little is known about the habits of this bird.

Jimmy Coleman, who lives in a St. Louis suburb and reads the Post-Dispatch, sent me a marked editorial from that newspaper... which joins the Courier-Journal in recommending that Gov. Earle C. Clements appoint John Sherman Cooper to the vacancy which will be created when Senator Barkley moves up to be Vice President. Jimmy likes the idea. My guess is it will not happen.

It seems clear the people of the country want a more liberal attitude on the part of their lawmakers than is exemplified by the Republican philosophy of government... and, while Senator Cooper voted with the Democrats a few times, his whole background and upbringing are GOP, so that he could be expected to vote with the Republicans most of the time.

Something like 50,000 Democrats scratched their ballots to vote for Mr. Cooper in the last election... and he is a very large figure in Kentucky's political future; but the GOP will have to kick out its Old Guard leaders, put in some young and liberal men, like John Cooper, and get in step with modern trends... before Kentucky can be served well by a Republican in the Senate.

## Literary Guidepost

DIARY OF INDEPENDENCE HALL, by Harold Donaldson Eberlein and Cortlandt Van Dyke Hubbard (Lippincott; \$3.50)

Independence Hall, "ancient Philadelphia Dowager" as Richardson Wright calls the venerable shrine in a prologue to her "diary", began as a State House. Legislators proposed a special home for themselves and their theoretically important activities in 1728 and, frightened by riots, pushed a construction bill through to be signed by Colonel Gov. Gordon the following year. Designed by Andrew Hamilton and erected on a lot by him, it was ready for an Assembly meeting in 1730; the steeple was completed in 1752, and the bell, cracked and recast, was hung in 1753.

That was the occasion for general rejoicing, and for one of the many banquets which enlivened the old lady's history. But there are sterner pages. In 1783 mutinous soldiers surrounded the State House, on the premises where in 1775 they had drilled, to demand back pay. In 1798 a congressman spat tobacco in a colleague's eye. In 1800 Republicans battled Federalists.

The Declaration of Independence, the Pennsylvania State constitution and the Federal Constitution were signed there, where Washington took the oath

of office for his second term and John Adams was sworn in as second President. For the last decade of the century it was the U. S. Capitol.

While the British occupied the city, they used it as a jail and left it filthy; and on two occasions the legislators fled their hallowed hall, once from Redcoats and once from yellow fever.

It was a good idea to hand this historic pile a pen and let her tell her own story; slicks and stones have been eloquent before. But Independence Hall should have learned, in 200 years, to write a little more manfully, and the oginate use of

"is" for "is" and "has" find's very boring.

North is placed at the maps not for any special reason but simply because the sun has been followed for hundreds of years.

The Greenhead mallard is the most plentiful and known of all American waterfowl.

The courtship of the Mexican duck is a graceful performance, taking place in water and in the air. But male is among the drabber American drakes.

## Reap the rewards of a VOLUNTEER!

With the new draft law now in effect, the advantages offered to volunteers who enlist for 3 years in the Regular Army never looked brighter.

Choose duty in Japan or Korea with a famous combat division. Get high overseas pay. Quality for officers' training... win promotion. Be a leader!

If you're a high school senior or it's equivalent, you can pick the technical school course you want before enlisting and, if accepted, be sure of attending it.

Men 18 to 34 (17 with parents' consent) are eligible for all these splendid advantages now open to 3-year enlistees. So why wait? Apply now at your U. S. Army and U. S. Air Force Recruiting Station.

COURTHOUSE

PRINCETON, KY.

Saturday, November 27, you and other Fire-Cured and Dark Air-Cured tobacco growers will have an opportunity to decide the question of continuing marketing quotas.

As in the past, you can vote for one of three propositions: You can vote for quotas for three years, 1949-1950-1951; you can vote for quotas for only one year, 1949; or you can vote against quotas. Any person who has a share in a Fire-Cured or Dark Air-Cured tobacco crop this year, either as owner, operator, tenant, or sharecropper, is entitled to vote. No person, however, may vote more than once. Any farmer who produces both Fire-Cured and Dark Air-Cured tobacco is entitled to vote in both the Fire-Cured referendum and in the Dark Air-Cured referendum.

This decision on whether marketing quotas and government loans will be continued is vital to you and other Fire-Cured and Dark Air-Cured tobacco growers. The decision of growers, as expressed at the polls, will be final.

We urge you, therefore, to take part in making this important decision. Go to your polling place SATURDAY, NOVEMBER 27, and cast your vote.

Polls will be open from 7 until 5 o'clock at the following voting places:

**County Agent's Column**  
By R. A. Mabry

Producers can make flocks more profitable by using for and culling out pullets that are slow going into production. Experiments show well for white leghorns that start laying by the time they are six and one half months old and heavy breeds by the time they are around seven months old ordinarily do not lay good layers throughout the year.

Pullets that should be culled from the flock are those that have been slow in reaching maturity, have underdeveloped combs, birds with a long, narrow head, and narrow pelvic bones. Layers should have at least three finger widths between the pelvic bones and two and one half finger widths between the pelvic bones and the end of the breast bone.

It may be that some hens are starting to lay because the aggressive pullets keep being fought off from feed hoppers. Such cases may be eliminated by providing plenty of space. Chickens are very susceptible to diseases when crowded together. Drafts, damp floors, and poor conditions and poor ventilation are essential with openings on the south side of the house.

This is the season of high egg prices and every precaution should be taken to keep the flock in production.

**Phosphate Boosts Strawberry Yield**  
Application of superphosphate increased strawberry yields in Jefferson county as much as 101 crates an acre, according to the Agricultural Experiment Station at Lexington.

Where no phosphate was used, the yield averaged 249 crates to the acre. Where 500 pounds were used, the yield was 296 crates an acre, and where 1,000 pounds was added to the soil, the yield moved up to 350 crates.

The superphosphate was applied to the top of the rows in late winter.

It should be provided. Plenty of ventilation is essential with openings on the south side of the house.

This is the season of high egg prices and every precaution should be taken to keep the flock in production.

**ASTHMA**  
Don't let coughing, wheezing, recurring attacks of bronchial asthma ruin sleep and energy without trying MENDACO, which works thru the blood to reach bronchial tubes and lungs. Usually helps nature quickly remove thick, sticky mucus. Thus alleviates coughing and aids free breathing and better sleep. Get MENDACO from druggist. Satisfaction or money back guaranteed.

**Close Planting Increases Yield**  
Richard Clements was named 4-H club corn derby champion of Hopkins county when he harvested 156.7 bushels an acre. Young Clements profited by his experience of a year ago when he failed to win the contest. At that time he resolved to remedy the situation by planting more corn an acre, and so he closed up his planter wheels and increased the size of the corn plates. In addition, he almost doubled the amount of fertilizer used and also used 100 pounds of nitrate an acre. Clements was selected as the outstanding 4-H club boy for this year from Hopkins county.

**QUAKER 3210**  
Does it!  
No other heater but the beautiful QUAKER 3210 is equipped with QUAKERTRON... the marvelous device that cuts fuel costs... delivers more heat by creating its own controlled draft regardless of chimney condition. Yes, the QUAKER 3210 is the kind of work-free heat you have always wanted. Just a turn of the dial and all the heat you want is gently circulated through every room. No smoke, no soot. And remember... the money you save in fuel costs can pay for this beautiful QUAKER 3210.

POTATOES PRESERVED—With regular storage space filled to capacity with this year's bumper crop of potatoes, the overflow is dumped into trenches on a Hicksville, L. I., farm to safeguard them against frost until they can be marketed. (AP Wirephoto)

**More Cover Crops Seeded**  
Farm Agent J. R. Davis of Carlisle county estimates that 12,000 acres of cover crops have been seeded this fall, an increase of 50 percent over last year. He cites the case of George Watson of Burkley, who, in 1947, seeded 35 acres to cover crops. This fall Watson bought a 50-ton car of rock phosphate and applied it to 100 acres seeded to winter oats, fescue and ladino clover.

**Butchering Booklet Free**  
Now that butchering time is approaching, it is a good idea to see that all the equipment needed is at hand, including a copy of Circular 261, "Killing, Cutting and Curing Pork," put out by the College of Agriculture and Home Economics, University of Kentucky. Included are recipes and directions for making special meat products, such as sausage, head cheese, pickled pigs' feet and scrapple. Copies of the free booklet may be had from offices of county and home agents, or from the college, Lexington.

**Highway Stop-Go Signs To Be Used**  
Frankfort—The red flag warning motorists of repair projects will soon disappear from Kentucky highways and in their place road crews will use reversible "stop" and "go" signs.

Department of Highways Maintenance Director M. F. Johnson said after December 15 all road crews will use these wooden signs for the control of traffic and for the protection of men working on pavement maintenance and repair.

Johnson said a stop sign will be posted at each end of repair projects and motorists, when stopped, will be advised of the length of the stretch under repair and asked to proceed with caution.

"This system, similar to the railroad crossing warning system, will be an improvement over the old method of flagging," Johnson said. "Often when a motorist sights a flagman on the highway he does not know whether to slow down, speed up, or continue at normal speed. When he sees one of these new signs he will know to come to a complete stop."

**Clark To Edit Journal**  
The Journal of Southern History, quarterly official publication of the Southern Historical Association, will be moved to new headquarters at the University of Kentucky and placed under the editorship of Dr. Thomas D. Clark, professor of history. Placing of the historical journal at U. K. was termed "a real boon to historical scholarship in this region" by Dr. Clark.

**Vittles Bowl**  
Berlin —AP— Add to the American football "bowl games" the "Vittles Bowl."

The newcomer is named after "operation vittles"—the Allied airlift which is supplying Western Germany over the Russian land blockade.

It will be played in Western Germany between service teams. Proceeds will go to the U. S. Army's German Youth Activities Fund to give Christmas parties for German youngsters.

**UK 'Professor Of Year'**  
One hundred and forty-nine faculty members of the University of Kentucky College of Arts and Sciences were listed as eligible for selection by their colleagues as the 1948-49 "Distinguished Professor of the Year". The honor is bestowed annually in recognition of outstanding accomplishment in a chosen field.

The last stronghold of the Indian lion is in the mountains of the Kathiawar Peninsula.

**WHAS To Broadcast  
Kentucky Cage Games**

Again this year the Reynolds Metals Co. of Louisville has announced the sponsorship of basketball broadcasts of most of Kentucky's leading schools over Radio Station WHAS. This season the games will all be broadcast at game time and will include such traditional battles as Eastern-Murray and Kentucky-Notre Dame, Dec. 4, U of L-Indiana State, Louisville; Dec. 11, Western-Bowling Green, Bowling Green, Ky.; Dec. 18, Kentucky-St. John, New York; Jan. 8, Eastern-Murray, Murray; Jan. 15, Kentucky-Tennessee, Knoxville; Jan. 22, Kentucky-De Paul, Chicago; Jan. 29, Kentucky-Notre Dame, Louisville; Feb. 5, U of L-Washington U, Louisville; Feb. 12, Kentucky-Xavier, Lexington; Feb. 19, Kentucky-Georgia Tech, Lexington; Feb. 26, Kentucky-Vanderbilt, Lexington; Mar. 5, KMAC Finals, Louisville; Mar. 12, SEC Semis and Finals, Louisville; and Mar. 19, High School Semis and Finals, Louisville.

The Ross goose was named for Bernard R. Ross, a correspondent of the Smithsonian Institute and a factor of the Hudson Bay Co., who sent out the first specimens from the Great Slave Lake regions. It is the smallest of all geese.

**Names McVey Scholar**

The University of Kentucky's Frances Jewell McVey Memorial Scholarship for 1948-49 has been awarded to Beverly Jeanne Davis, a Nicholasville junior in the College of Arts and Sciences. The scholarship represents interest of an investment of nearly \$20,000, contributed by more than 500 friends of the late wife of University President Emeritus LeRond McVey.

**Britain Makes Use  
Of Women's Gossip**

London—AP—Talkative women can be very useful in helping Britons understand how to achieve economic recovery, says Sir Stafford Cripps, the nation's economic minister. Addressing a recent meeting of labor party and trade union women, Sir Stafford smilingly noted: "It may be that men are wrong in accusing women of being gossips, but from the point of view of putting across the true story of our problems, our efforts and our successes, who can do it better than the women in those casual and intimate talks that she has with friends?"

Canvassack ducks are the favorite ducks of most U. S. hunters. They are expert divers and indiscriminate feeders.

**CROWD CHEERS NEWS OF PRINCE'S BIRTH**—A throng outside the gates of Buckingham Palace in London cheers the announcement that Princess Elizabeth gave birth (Nov. 14) to a prince who may someday become King of England. The condition of Princess Elizabeth and her son was reported as "satisfactory." (AP Wirephoto by radio from London)

**Tarheels Seem Bent On Proving  
Superiority Of Old Formation**

By Ken Alyta  
(AP Newsfeatures)

Chapel Hill, N. C. — Coach Carl Snavely says he is not crusading on behalf of the venerable single wing formation but his University of North Carolina football team seems bent on asserting superiority over the increasingly popular T.

In sweeping their first five games the Tar Heels whipped four teams employing the T—Texas, Georgia, Wake Forest and LSU.

"I don't go all out to beat a team simply because it uses the T," he says. "As a matter of fact, we've had a T team of our own here at Carolina right along, running an offense against us since last spring practice."

Whenever we hear of something new in the T system we give it a try in practice to see if it might be fitted into our attack.

"I'll tell you this much: In the spring the T team was given a week to prepare its plays before we sent a defensive unit against it. The T club went well the first week of work, but thereafter our defense gradually caught up with the offense and had it pretty well checked. We just don't think we've yet seen a T that would give us the results we get now."

"We've found that the single wing style enables us to make more yardage, keep the ball longer and make more points than any other offense. It is best suited to our personnel."

"Furthermore, I believe the single wing teams are stronger now because, with the growth of the T, teams are becoming less accustomed to defending against the single wing."

"Statistics I kept last year show that among 50 representative teams in the country, single wing teams averaged about six points more a game than

those using other systems."

Snavely disagrees with critics who say using a player chiefly on offense and another to replace him on defense, as has been done at North Carolina since early last season, develops only half a player.

"We are not interested in developing All-Americans for the pros to play," the gray fox declares.

"We are more concerned with winning games and seeing that the boys derive the benefits of good competition. We'll use any boy in his specialty if he excels in any one phase of the game."

"Of the two units with which we started the season about four of the offensive men could be standouts on defense as well. But by using separate offensive and defensive teams more boys have a chance to play. No, the defensive team doesn't mind playing without the ball. You know, any boy interested in football would rather play than sit on the bench."

Snavely says college football is better today than ever.

"This is not a permanent condition," he points out. "But with so many older, experienced, ex-servicemen in school the quality of play in general is higher than it ever was."

The 54-year-old native Nebraskan, who began his college coaching career at Bucknell in 1927 and spaced two stays at North Carolina with nine years at Cornell, has a warm spot in his memory for his unbeaten 1939 Cornell team.

But his current red-hot aggression, which he says has the edge over that favorite Big Red club in size and experience, may make him revise that opinion along about Jan. 1. That's the date of the Sugar Bowl game and it's been marked in many a Tar Heel fan's future book.

**Little Tykes Need  
Helping Hand**

By David Talyor Marke  
(AP Newsfeatures)

"I sometimes wish all parents would hang upon the wall, where they could see it, a framed sampler bearing the legend, 'The Child Is Helpless', says Bonaro W. Overstreet, noted author, lecturer and adult educator.

Writing in the magazine National Parent-Teacher, she explains that the extent to which parents realize this fact and respond to it, will largely determine the child's later capacity to handle life.

Parents need not, of course, be reminded that the child cannot provide its own food and shelter. This is ancient parental knowledge, she says. What we have only begun to realize, however, is how helpless the child is to satisfy its own emotional needs; how precarious its psychic condition is unless the parents provide a steady reassuring diet of love.

It was long believed, says Mrs. Overstreet, that the babe in arms, and even the toddler and growing child, lived in a blessed world of its own, immune to the problems of grown ups. Psychiatrists have made short shift of this happy illusion. On the basis of clinical experience, they are prepared to insist that even the smallest infant is "aware"—in however vague and dispersed a fashion—of an emotional tension in the environment upon which it depends for its security.

When infant Kenneth, for example, becomes suddenly unable to digest his food he may be experiencing, at second hand, an anxiety or irritation communicated to him by his mother. Or the cause may lie in a haunting fear bred in him when he overheard a violent quarrel between his mother and father.

Two parental attitudes must probably share the blame for most of the stored-up, unconscious guilt feelings and distort the lives of children, and of the adults whom those children become, says Mrs. Overstreet. The first attitude is whimsicalness. Where moods are undependable and rules erratic, a child cannot work out any way of behavior that will reliably insure his winning approval and affection. Never being sure what is wanted, the child is continually

subject to a sense of failure and guilt.

The second attitude, she says, is irrational severity. When a child cannot live up to what his parents demand, he may suffer such guilt feelings that his chances of ever becoming a happy, emotionally liberated society may suffer a real loss.

**Brunettes Outnumber  
Blondes And Redheads**

Chicago—AP—Are there more brunettes than blondes? Andre Basil, hair stylist at Chicago's Ambassador Hotel, says there are. During his 25 years of designing women's coiffures, he figures he has cut 21,910,000,000 hairs. Of the 78,250 hair cuts he has given over the world, he said the proportion of brunettes, blondes and redheads was 60 percent, 35 percent and 5 percent respectively.

In other words of the total hairs cut, 14,080,000,000 of them were brunette, 6,847,000,000 were blonde and 978,000,000 were auburn.

The larvae of clothes moths are active at temperatures above 70 degrees.

Los Angeles claims to have had the first movie theater in operation, back in 1902 when the admission was 10 cents.

At temperatures below 70 degrees the larvae of clothes moths are not active, but they do not die.

**Great Team Grab Makes Pro Loop Strongest Cage Group Ever Assembled**

By Jim Becker  
(AP Newsfeatures)

New York—Bolstered during the off-season by the "great team robbery," the Basketball Association of America is set to open a campaign that may be the making of professional basketball.

The BAA has annexed the champion team, the runner-up squad, and two other fives from the rival National Basketball League, and in this grab it also acquired the cage sport's top drawing card—big George Fikan of Minneapolis. The loop, which began its career in 1946 with 11 teams but shrank to eight last season, thus will offer 12 teams this campaign. The expectations of really tight races in both eastern and western divisions are no press agent dreams.

Four teams are outstanding in the west and three in the east and genuine moves have been made to strengthen the other clubs. The western division includes Minneapolis, NBL champ which beat Rochester three out of four for the title, Rochester, St. Louis, Chicago, Indianapolis and Fort Wayne.

St. Louis and Chicago are the only holdovers, and both were among the league's best teams last season. St. Louis was the western division champion in the BAA, and Chicago finished in a second place tie with the other two teams, only a game back. A race can't get much tighter than that.

Minneapolis won in the west in the NBL, Rochester in the east. The Minnesota quintet won 43, lost 17, while Rochester won 44, lost 16 over the season. Besides Mikan the Lakers offer

Jim Pollard, great Stanford star, but it is Mikan who packs 'em in. Big George scored 1195 points last season in 56 games—an average of 21.3—and broke every scoring mark in the loop.

His battle for scoring supremacy with sensational Joe Fulk of the Philadelphia Warriors, who won the BAA ball-dunking title the first season, and Chicago's Max Zaslofsky, who won last campaign, should be as tight as that western flag chase.

In the east, Baltimore, league champion last season; Philadelphia, eastern titleholder (Baltimore was in the western group in 1947-48) and Washington are the top clubs. Baltimore won the championship last season, although the Bullets finished in a tie for second in the regular tling in the post-season matches standings, under the complicated six of the eight teams battled, BAA playoff set-up which for the crown. Washington tied

**13 Ponds In County Stocked With Fish**

The Fish and Wildlife Service, Louisville, delivered 7,000 bluegills for stocking 13 ponds on farms of cooperators of the Caldwell County Soil Conservation District, this week. The large mouth black bass to complete the stocking of the ponds are to be delivered next spring, is was announced by Oliver C. Allcock, Soil Conservation Service. One acre of pond properly stocked, fertilized and managed should support from 400 to 600 pounds of fish, Mr. Allcock said. Those receiving fish were: C. E. George, H. C. McConnell and Son, Gray Satterfield, Claude B. Wood, Harry Joiner, Edward Blackburn, Everett Creasey and Joe Cummins.

Pete Maronic, brother of the pro Philadelphia Eagles' guard, Duke, is one of the top prospects on the Villanova college freshman team. He is a 220-pound tackle.

Dick Bagley, Syracuse tackle, is the largest griddier on the Orange Squad. He stands six feet, five inches and weighs 255 pounds.

Ted Webster, Syracuse swimming mentor, is coaching his 16th team for the Orange.

**Washington Letter**

By Jane Eads

Washington — With millions of dollars spent each year by American women on wearing apparel, it would seem that all women should be well-dressed. But this is far from the truth, says Phyllis Bell, local fashion expert. Miss Bell, a handsome red-head with big brown eyes is owner and director of a school for self-improvement catering largely to government girls.

"We have been amazed to find how many misconceptions are harbored by those who come to us for guidance," Miss Bell told me. She says most wardrobes contain too many unbecoming, ill-matched items and too many outfits of one type, thus making it impossible for the owner to be well-dressed except on a highly limited number of occasions.

"This is often due to the fact that wearing apparel is assembled on the spur of the moment, according to the whim and the immediate needs of the purchaser and without plan or sufficient knowledge of design to buy intelligently," she says. Women should have developed a sharp-minded picture of their definite mode of living, before they can realize the possession of a well-rounded wardrobe.

In her "Key to a Perfect Wardrobe" she outlines for the government girl the fundamental principles of dress, emphasizing the importance of line and drape—"What the stout woman wears"; "What the tall woman wears"; color effects on the skin, hair and eyes; daintiness; posture, thriftiness. She suggests a minimum wardrobe.

"A single woman with optimism is primarily interested in date clothes," she says, adding that she will need five to six first-rate outfits suitable for her social life.

"She adds variety by selecting for office basic, tailored or simple things that, with a change of accessories, transform her from an efficient secretary to a trim, provoking bit of femininity." A business or professional woman with few social activities, she says, needs four or five be-

**Football Kills More Fans Than Players**

The rugged game of football kills more spectators than players. That's a warning of the safety specialists of the Association of Casualty and Surety Companies, who point out that most of the fans get killed in auto accidents going to or from the games. Allow plenty of time to get to the game and take it easy when leaving, the safety men urged drivers inclined to hurry. Also remember that old, but sensible, warning: "If you drink don't drive, if you drive don't drink."

**Good Living**

(Continued From Page 1)  
also increase somewhat.

Much lower prices already have made it more profitable to feed corn to livestock than sell it as grain, even though hog prices are slipping. The careful spooning out of corn last winter, following the short crop, is no longer necessary.

In October, the agriculture department said, the average price received by farmers for each 100 pounds of live hog was equal to about 17.8 bushels of corn. This compared with the long-time October average of only 12.7 bushels.

Prices of dairy products are much higher than average in relation to feed prices. The department said in October dairymen fed their milk cows about 13 percent more grain a cow than a year earlier, and about 10 percent more than in 1946.

Result: More milk a cow. Eggs produced in September, the department said, averaged about 8 percent higher than last year, "and this also may be due partly to more liberal feeding a bird."

"At least as many cattle will be grain-fed this winter as last," the department added, "and the numbers of hogs and chickens are expected to increase in 1949."

coming basic costumes that go to business and, with a change of accessories, go to tea, dinner or the theater.

A woman who is constantly seldom wear B outfits (slightly worn) and never C ones (suitable only for unimportant occasions before the public she says should

**Best 4-H Attendance At Award Day To Get Prize From Chain Stores**

Attendance prizes based on attendance will be awarded 4-H Clubs Saturday by the Princeton Chain Store Group at the annual 4-H Achievement Day. Song contests and colored slides, in addition to the free movie, will feature parts of the event held in the Capitol Theater from 10 to 12 o'clock. Any 4-H Club may enter the song contest to be given by one or more members of each club or by the entire club. Frank Pool, vice-president of the county organization, will preside, while Martha Porter will lead the pledge to the flag. All 4-H members, teachers, parents and leaders are invited to attend.

**Nylon From Peat**

Warsaw—AP—Polish chemical engineers claim they found a way to make stockings from peat. Two chemists employed in the chemical industry institute at Blaskup working on a method of extracting phenol from peat.

The semi-official news "Rzeczpospolita" said "phenol an essential ingredient in production of nylon. So far, but peat proved a much raw material, having three more phenol than hard coal."

Fish have been found mountain lakes above the of perpetual snow.

**Nylon From Peat**  
Warsaw, AP—Publishers of the world's largest stock of stockings claim they have found a way to make stockings from peat. Two chemists employed in the peat industry in the north of Ireland are working on a method of making phenol from peat. The semi-official news agency said the process is essential ingredient in the production of nylon. So far, the peat has proved a much better material, having three times more phenol than hard coal.

Fish have been found in mountain lakes above the perpetual snow.

Fingerprinting was not used until the late 19th century.

**Country Club Dance**  
There will be a Thanksgiving Eve Dance at the Princeton Country Club Wednesday night, Nov. 24, from 9 until 10 o'clock. Billy Adair and his Murray Knights orchestra will furnish the music. Members may invite both in-town and out-of-town guests.

**Bridge Party**  
Mrs. Hewlett Morgan was hostess to her bridge club Thursday night, Nov. 11, at her home on Hopkinsville street.

First prize was awarded to Mrs. Frederick Stallins; second and bingo, Miss Vergie Barnett.

Refreshments were served to Mesdames James Landes, T. J. Simmons, James McCaslin, Frederick Stallins, Stanley Sharp, Thomas Lacey, James Walker, Hillery Barnett, James Shrewsbury, Billy McElroy and Misses Mary Loftus and Vergie Barnett.

**Gillespie Circle**  
The Gillespie Missionary Circle of the First Baptist Church met at the home of Mrs. Betty Lee Tracey Tuesday, Nov. 9, with fifteen members answering roll call.

After the business session Mrs. George F. Satterfield gave the devotionals from Isa. 45: 20-25. Mrs. Clifford McConnell gave a talk on "Our Saviour For Asia and The Islands of The Sea."

During the social hour the hostess and co-hostess, Mrs. Erbie Lane, served delicious refreshments to: Mesdames Paul Owens, Kenneth Spickard, George Satterfield, Lowry Caldwell, Ted Gray, Charles McLin, John Baldridge, Joe Weeks, James Carr, Sam Steger, Clint Hubbard, Clifford McConnell and Miss Irene Beckner.

## DISTRICT CLOTHING CHAMP

**Jacqueline Shoulders**  
Jacqueline Shoulders, a member of Butler 4-H Club, is district clothing champion. She is modeling a yellow balloon cotton evening dress which she wore in the county and state 4-H style revue. She won a blue ribbon in each contest.

Since 1945, Jacqueline has completed 13 projects in clothing, canning, beef calf and home improvement. She won a blue ribbon, a red one and \$5 in prize money at the State Fair.

Jacqueline was selected clothing champion at the district achievement meeting held recently in Hopkinsville. During the past year she made five dresses, two formal, two play suits, accessories and three other garments to win this honor from seven counties.

She received the Kiwanis award as 1947's outstanding 4-H girl.

## Nutritious Salads For Fall Meals

By Cecily Brownstone (AP Food Editor)

No one was more surprised than I to see on a recent survey made among homemakers that more recipes for salads would be welcomed. I always have believed that salads were concocted on the spur of the moment out of what was in the refrigerator without definite recipes.

Now I'm wondering whether this great interest in salad recipes isn't occasioned by the fact that mothers of families have been learning through food columns—that good nutrition demands they feed their families several kinds of fruits and vegetables every day... preferably some of them raw. In an attempt to get husbands and youngsters to eat and like salads they've probably found they could stand a little help.

A friend of mine—a man who reads the food columns—asked me once whether nutritionists and home economists and food editors had solemnly pledged themselves to mention a "tossed green salad" every time they wrote a piece! I hastened to assure him that I liked salad green—and missed them when I didn't have them—but there was no reason why they should appear alone. Moreover, salads—whatever their kind—do not always have to accompany the main dish.

A salad can come at the beginning of the meal, California appetizer style. Avocado combinations, for instance, are always delicious starters. One of these starter salads I particularly like is made of avocado, orange and watercress with French dressing. Coldsaw makes a good appetizer, too, when it's coupled with celery and carrot sticks, black or green olives, fennel, or what you will.

One of the reasons why I think people who come to my house always like the salads is that I serve them with some fanfare. There are various ways you can do this. Mixing the dressing right there in front of everyone with the help of interesting bottles of herbs or to

use attractive salad bowls and servers.

Here is a Frozen Fruit Salad beloved by equally ladies of bridge-luncheon and current events groups. And when it comes to a family or company dinner it doubles delightfully for dessert. Don't let anyone (gourmet or otherwise) tell you it's a woman's tearoom food—I've seen men lap it up.

**Frozen Cream Cheese and Fruit Salad**

Ingredients: 1 three-ounce package cream cheese, 3 tablespoons mayonnaise, 1 cup canned sweet cherries, 1/2 cup maraschino cherries, 1 cup orange membrane-free orange sections, 1 cup sliced walnuts, 1 cup crushed pineapple (drained), 1 cup whipping cream. Method: Allow cream cheese to stand at room temperature to soften; cream with mayonnaise. Cut sweet cherries in halves. Cut orange sections in thirds. Combine cream cheese mixture with cherries, orange, sliced walnuts and pineapple. Whip cream and fold into fruit mixture. Pour into 12 custard-cups, 5-ounce size. Set cups in freezing compartment of refrigerator for about 3 hours or until frozen. When salad is frozen remove from refrigerator and unmold by slipping a small knife around salad. Serve on salad greens.

In making percolated coffee allow the coffee to percolate, after the water begins to be amber in color, for only 5 to 10 minutes. If percolated too long the coffee is likely to be bitter. Ored various ways; a dash of celery salt and a little Worcestershire sauce adds tang, and so does finely grated onion. A few toasted almonds sprinkled over the top makes the dish crunchy and delicious.

## CANDY FOR THANKSGIVING

As a token of friendship, buy a box of SCHRAFFT'S or BELLE-CAMP CANDY

These candies are made of the finest quality ingredients and careful skill used in creating their distinctive flavors have long made them the one gift to express your sweetest thoughts.

## Lottie Moon Circle

The Lottie Moon Circle of the First Baptist Church met at the home of Mrs. Cecil Smith Tuesday night, Nov. 9, with nine members present.

The devotionals were given by Mrs. W. E. Willis and Miss Melville Young had charge of the program, assisted by Mrs. Claude Koltinsky and Mrs. Robert Jacob.

Present were Mesdames Robert Jacob, Gordon Glenn, Claude Koltinsky, Cecil Smith, W. E. Willis, Alvin Lisanby, Misses Gwen Booker, Mary Wilson Baker and Melville Young.

The hostess, assisted by Mrs. Robert Jacob, served a delicious plate lunch.

The next meeting will be held at the home of Mrs. Robert Jacob in December.

## Leader Congratulates

Mr. and Mrs. H. E. West, Green Cove, Fla., on the birth of a daughter, Sue Carol. Mrs. West is the former Adelaide Ratliff, daughter of Mrs. J. H. Ratliff, N. Seminary street.

Mr. and Mrs. Lionel Stroube, Route 3, on the birth of a daughter, Sylvia Jean, November 11.

## Personals

Mrs. Floyd Scott spent Thursday in Paducah.

Mr. B. B. Boitnott, accompanied by Mr. and Mrs. O. E. Allen and Mrs. Floyd Scott, spent visiting hours Monday afternoon at Jennie Stewart Hospital with Mrs. Boitnott, who recently underwent an operation.

Mrs. Curtis Coleman is in Mt. Vernon, Ind., this week, where she was called on account of the serious illness of her father.

Miss Katharine Garrett has returned from a visit in Chicago, Ill. She also visited Mr. and Mrs. F. B. Curtin, Kalamazoo, Mich., and Mrs. M. M. Olander, Sylvania, O.

Mrs. J. A. Stegar is visiting her daughter, Mrs. Guy Martin and family, in Chicago.

Mr. and Mrs. Hugh Cherry spent last weekend in Louisville. Mrs. Cherry stayed until Wednesday, during which time she visited her sister.

Judge and Mrs. G. G. Harralson and Mr. and Mrs. Sam Koltinsky spent last week in Louisville.

Mr. and Mrs. Gordon Lisanby and Mr. and Mrs. Frederick Stallins attended the Florida-Kentucky football game at Lexington Saturday.

Mrs. Eugene Seaton, Paducah, is spending this week with her daughter, Mrs. George Eldred, and family.

Mr. and Mrs. Tom Stallins, Tampa, Fla., will arrive Sunday to spend 10 days with his parents, Mr. and Mrs. Fred Stallins, Madisonville street.

Mr. and Mrs. Jack Land, St. Louis, Mo., are spending a two weeks' vacation with her parents, Mr. and Mrs. J. E. French, Hopkinsville Road.

Mr. and Mrs. J. E. French were visitors in Hopkinsville Monday.

Mr. and Mrs. A. P. Cook, N. Harrison street, will leave this week-end for West Point, N. Y., where they will visit their son and his family.

Mr. and Mrs. R. T. Humphries and daughters, Ann and Rebecca, spent the week-end in Benton, Ill., as guests of Mr. and Mrs. J. G. O'Hara.

## Frank Linton Wins Chicago Trip

Frank Linton, Princeton student at the University of Kentucky College of Agriculture, will go to Chicago the last week in November as a member of a livestock judging team who will judge stock at the International Livestock Exposition.

Twenty-one Kentucky farm boys and girls who did outstanding 4-H work this year also will receive trips to the National 4-H Club Congress and Livestock Exposition.

Included in the groups will be Woodford county's fat stock judging team, members of which

are Charles and Kenneth Reed and Bill Curry.

Other club members and the projects in which they excelled are Julia Maureen Ross, Harrison county, foods; Elsie Clausen, Oldham, room improvement; Martha Routt, Oldham, clothing; Eloise Lorch, Jefferson, housekeeping; Doris Ruth Feltner, Laurel, canning; Elizabeth Ann Marshall, Madison, dress revue; and Elsie Marie Isaacs, Clark, girls record.

Charles Schadler, Jr., Campbell, garden; Doris Lee Smith, Jefferson, swine; Paul Rankin, Boyle, beef; Wallace Montague, Owen, dairy; William Adams, Gallatin, farm labor; Tommy Phillips, Simpson, sheep; Joe Willett, McCracken, corn; Ivan

## College Radio Schedule

"Meat Canning" is the subject to be discussed Nov. 22, at 12:45 p.m., over radio station WHAS by Mrs. Pearl Haak, canning authority at the College of Agriculture and Home Economics, University of Kentucky. Succeeding radio programs at that hour will be: Nov. 23, Grady Sellars, "The Home Pork Supply"; Nov. 24, Robert H. Ford, "Farm Newscast"; and Nov. 26, "Questions from Farm People." On Nov. 27 at 11:45 a.m., Miss Vivian Curnutt will discuss "Planning Room Color Schemes."

In early times, whales stranded on shore in England and Scotland were the property of the crown. Friction matches were first made in England in 1827.

G. Emerson, Russell, poultry; Rollin Shufflet, Green, meat animal; Juanita Teegarden, Bracken, farm safety; and George Kirk, Martin, leadership.

Other members of the UK student team are Carl Hamilton, Falmouth; Beryl McClain, Corinth; James Wells, Arlington; and Robert Hicks and Roy Camie, Lexington.

**NEW AMERICAN ASSOCIATION PRESIDENT**—Bruce Dudley, president of Louisville Baseball Club and former sports editor of Louisville Courier-Journal, was named president of the American Association at Cincinnati, O. He succeeds Frank Lane, who has been named general manager of the Chicago White Sox. (AP Wirephoto)

## Remodeled Kitchen Cuts Work Load

Since Mrs. Leonard Alexander of Nicholas county had her kitchen remodeled and rearranged, she has saved herself an annual trek of 20 miles in getting breakfasts, to say nothing about the other meals. Formerly it required around 390 steps to get a breakfast; now, with better placing of equipment, it takes only 170 steps.

Following the suggestions of Miss Ida Hagman, home management specialist from the College of Agriculture and Home Economics, University of Kentucky, Mrs. Alexander has complete centers for doing the usual kitchen duties. There is one for mixing or preparing food, one for cooking it, and a third for washing dishes. In each instance, the utensils and equipment are at hand for easy access and to save steps.

It was through family cooperation that the pretty and convenient kitchen was made possible, stated Mrs. Alexander. Her husband built cabinets and made other needed changes, while two high school daughters covered counter tops and lined drawers with linoleum.

Room changes included the cutting of two windows and an outside doorway to permit better arrangement of equipment. Then an apartment size electric stove was bought to supplement a coal and wood range, and an electric pump to supply running water. Both hot and cold water were made available also to wash house, brooder and hen house.

A thrifty idea was to use an old kitchen cabinet and safe, the top halves being removed and hung on the wall. The lower halves were then placed on either side of the sink. Another cabinet which this homemaker finds especially handy was built by her husband. It is used as a storage place for wood and kindling.

## Tiling Helps

### Increase Yields

A 25-acre field on the farm of Dr. George Payne in Rockcastle county shows the result of tiling and treatment with lime and phosphate. Where he once got 25 bushels of poor corn to the acre, he this year harvested from 65 to 70 bushels, said Farm Agent Robert F. Spence. His hay crop, too, showed improvement, increasing from 1,500 pounds to the acre to 4,000 pounds. Dr. Payne straightened a creek on his farm and put in diversion ditches where needed.

## Veterans' News

A total of 4,155 veterans in Ohio, Michigan and Kentucky are amputees as a result of service in World Wars I and II, the Veterans Administration Branch Office in Columbus, O., reported today.

Voight W. Baker, chief of VA's Prosthetic Service in the three states, said the total included leg and arm amputees and those with partial amputations of the feet or hands.

There is none of the so-called "basket" cases—loss of both legs and both arms—in the three states, Baker said.

The number of amputees includes: Ohio, 1,722; Michigan, 1,433; Kentucky, 980. VA is paying disability compensation to all of these veterans, Baker said. In many cases the VA has assisted in the rehabilitation of the amputee veteran.

Five veterans in the three states suffered loss of both legs and one hand, 59 lost both legs or feet, eight lost both hands and six lost one hand and one foot.

Issuance of insurance policies to replace temporary certificates on most forms of National Service Life Insurance will begin in the near future by the Veterans Administration Central Office in Washington.

No action on the part of the veteran will be necessary to obtain the new policies, which will contain provisions of the NSLI contracts as outlined in the NSLI law.

Policies will be issued on renewed term contracts and for those converted to any of the six permanent forms. Certificates that have been issued on the original term insurance will remain in effect until renewed or converted. VA insurance officials estimate that it will require several months to complete the job.

## Rabbits Beat Sheep Eating 'Store' Feed

More commercial feed is sold in Kentucky for rabbits than is sold for sheep, according to the Feed Control Department of the Agricultural Experiment Station, University of Kentucky. Compared to 1,450 tons of sheep feed sold last year, rabbit feed totaled 4,215 tons, and dog feed, 10,505 tons. Five hundred tons of commercial feeds were bought for goats.

Estimated on the number of tax tags, a total of 582,375 tons of commercial feeds were sold in Kentucky the last year. Of this tonnage, 140,025 tons were dairy feed; 37,570 tons, hog feed; 25,630 tons, horse and mule feed; 134,085 tons, poultry feed; 3,995 tons, mineral feed, and 153,880 tons, straight by-product feed.

Commercial feed sales have increased from 333,138 tons in year, which was 65,286 tons less than in 1946.

Eskimos use boats made of skins stretched over a wooden frame. In times of famine they remove the untanned skins, boil them and eat them.

The term "fifth column" was first used in the Spanish Civil War of the 1930s.

## Boosts Corn Output

An increase from 35 to 71 bushels of corn to the acre is the record made by C. L. Walker of Benton, the first farmer in Marshall county to enter the corn derby contest. The increase would have been even greater

had there been sufficient rainfall, said Farm Agent J. Homer Miller. Mr. Walker seeded a cover crop last fall, then fertilized with 1,000 pounds of 3-9-6 and 10 loads of manure. The corn was side-dressed with 100 pounds of ammonium nitrate.

Baldpate ducks are closely related to European widgeons.

## Thanksgiving Cook's Quiz

By Cecily Brownstone  
(Associated Press Food Editor)

Time to plan Thanksgiving now! Time, too, to check in the most up-to-date practice in roasting a turkey if you want your bird to be perfect on before The Day.

How much dressing should follow?—One cup of dressing for each pound of turkey is a guide. The rule is to pack stuffing in lightly to allow expansion in cooking. This you'll achieve a fluffy, tasteful result.

How can you put two kinds of dressing in one turkey?—If members of your family prefer strong individual preferences for wet or dry, sweet or salt-sweet dressing, you make everybody happy by serving one kind of stuffing the body, another for the

the turkey's appearance, helps the bird to roast evenly, and makes carving easier. First step in trussing is to lift the wings up and out, forcing the tips back until they rest flat against the neck skin. Second is to tie the legs together and then pull toward the tail until the leg ends are right above it; now tie the legs close against the tail. After one hour of roasting the leg trussing should be cut, releasing the leg ends from the tail.

How do you use skewers?—To fasten the neck—after it has been filled with dressing—to the back. Also to close the abdominal opening so the dressing won't fall out by lacing it together with light cord and a few small skewers.

What are the advantages of a roasting rack?—Either a flat or a v-shaped rack raises the bird so that heat can circulate freely around and cook and brown it evenly. Roast the bird breast-down, except for the last quarter of cooking, when the breast may be turned uppermost to insure total browning.

And how about the cranberries to go along with the turkey? Here are some tips for their Thanksgiving preparation that ought to make them taste better than ever.

What kind of cranberries give the best eating?—In buying, choose berries that look fresh, firm, and shiny. If they're shriveled, dull-looking or soft, you may be sure they'll be of inferior flavor. Government experts say that the smaller, darker berries

## Missions Worker

Rev. H. J. Milchalchuk  
A Russian who will be featured in the coming Baptist School of Missions program, to be conducted in Caldwell and Lyon counties. He is working with the Slavic people of Illinois.

## Fredonia News

Miss Dorothy Brasher, Gilbertsville, spent the weekend with her parents, Mr. and Mrs. Cecil Brasher.

Miss Maggie Coleman, Paducah, was the weekend guest of her sister, Mrs. Leslie Bright and Mr. Bright.

Mr. Norman Lee Faught returned to Bowling Green Sunday, where he will resume his studies at Western State Teachers College. He was called home to be with his father, Adriaug Faught, who was injured in an automobile accident.

Mr. and Mrs. E. C. Harwood and children, Lellani and Charles, of Breckinridge homes, were guests of her parents, Mr. and Mrs. T. L. Grubbs, last Sunday.

Mr. and Mrs. Leslie Bright and Miss Maggie Coleman were guests of Mr. and Mrs. McGill in Sturgis Sunday.

Mr. Adriaug Faught has returned home from Princeton Hospital and his condition is reported to be improved.

Mr. and Mrs. Charles Young, Evansville, spent the weekend with her sister, Mrs. Veldin Yandell, and Mr. Yandell.

Mrs. John Butts left Saturday morning for Memphis, Tenn., where she will visit her daughter, Mrs. Glenn Whit, and family.

Mr. and Mrs. Marshall Rushing, Evansville, and Mr. and Mrs. Coy Moore were dinner guests of Mrs. Lee Burklow Sunday.

Mrs. J. J. Rodgers and sons, Keith, Donald and Larry, spent Sunday with her parents, Mr. and Mrs. H. H. Sullenger, near Tolu.

Mrs. Wilford Baker and Mrs. Carrie Orday were in Evansville shopping Tuesday.

Mr. and Mrs. Allen Fuller, Bowling Green, were weekend guests of his mother, Mrs. Ambie Fuller.

Master Bobby Williams spent the weekend in Princeton as guest of his grandparents.

Mrs. Annie Dean McElroy visited Mr. and Mrs. Dick Cruce near Crayne Sunday afternoon. "Uncle Dick's" condition is improving, it is reported.

Rev. and Mrs. Harlan Thomas and son are spending a few days in Rome, Ga., where the son is receiving treatments.

Mrs. Ray Lowery, Detroit, Mich., and Messrs. Clay and Glenn Reed, Duquoin, Ill., visited friends for a short time here last week. They had been called to Marion by the tragic death of their sister, Mrs. Hugh Driver.

Mr. and Mrs. T. L. Grubbs observed their golden wedding anniversary Tuesday, Nov. 9. A beautiful bouquet of yellow chrysanthemums were sent from Oklahoma. Other children are Mrs. E. C. Harwood, Morganfield, Frank Grubbs, Kuttawa, and Mrs. L. W. Baldwin, Bowling Green.

In honor of the 25th anniversary of Mr. and Mrs. Aubrey Litchfield, friends surprised them with a pot luck supper and entertainment at their home Saturday night.

ries may be somewhat sweeter than the rather large, bright red berries. For whole cranberry sauce the largest, brightest berries make the best appearance.

What else besides turkey goes well with cranberries?—If roast chicken, duck or pork are on your Thanksgiving menu you'll find the sweet-tart flavor of cranberries just right with them.

How long should cranberries be cooked for sauce or jelly?—Modern methods emphasize short rapid cooking as the best way to preserve flavor and color.

How about raw cranberry relishes?—Raw cranberry relishes are a comparatively new development in cranberry cookery—and one that's here to stay. They are likely to be so popular once you try them on your family and friends that they'll want you to include them every year. The base of all these raw relishes is the raw cranberry, put through the food chopper, usually using the medium knife.

Mr. and Mrs. Denzil Orton and son, Donnie, were visiting Mr. and Mrs. Willie Teear in Dawson Springs last Sunday.

Mrs. W. H. Pool, son, Frank, and daughter, Martha Sue, were guests of Mrs. W. M. Cartwright Sunday afternoon.

Thomas Robinson, a former Caldwell county citizen, now of Maryland, has been here on a visit to his brother, Lucion, Hugh Robinson, and his sister, Miss Mary Lou White, who has been under a doctor's care for an infected arm, is very much improved.

Mrs. J. M. Cook.

Mr. and Mrs. David Mitchell visited Mrs. Harvey Keller, who is a patient at Jennie Stewart Hospital in Hopkinsville, Sunday.

Mr. and Mrs. Ragon Cummins and son were recent visitors of Mr. and Mrs. Loell Haile.

Dr. Blazier of Princeton made a professional call here last Monday.

## What It Means—

## Television In Education

By Robert E. Geiger

Washington—Radio and television are about to give education a terrific shot in the arm. Educators say this shot will be given at the spot where it will do the most good—where it will help to teach the world's citizens how to get along with each other with less trouble. At the U. S. Office of Education here is the way educators are beginning to see things to come:

1. Television will become the electronic blackboard of the future—even in the little red schoolhouse. The great events of the day will be brought to the classroom. A class of medical students may witness a delicate surgical operation performed miles away. A whole school may see the President address Congress.

2. There are great opportunities for presenting educational courses in the home. Such classes not only would supplement classroom work but would also offer classes in adult education and specialized courses for the person who has completed his schooling but wants to keep up with developments in his profession.

Educators emphasize the possibilities of smoothing human relationships, and relationships between nations, because programs may increase understanding. This is possible because they can reach many more people than classrooms can, and can reach them throughout their lives, keeping them abreast of events

and issues.

There are two ways that radio and television instruction may be popularized. One is for the commercial stations to present educational programs. The other is for schools and colleges to operate their own stations. Already dozens of programs suitable for classroom and home work are offered by commercial radio broadcasters. And hundreds of schools use these programs.

In addition the Federal Communications Commission has just relaxed its rules for operation of FM radio stations by schools and colleges. Office of Education officials say the important fact about this relaxation of rules is that it means more schools can afford their own FM radio stations.

One official estimates it is possible for a school to obtain a sending station for as little as \$2,500 for the transmitting equipment and \$2,500 for a studio. Facsimile also is carried on the FM channel. Facsimile will reproduce charts, a page of reading material, maps, photographs, musical scores and many other types of educational information in the home.

Twenty FM channels have been set aside by the FCC for use of non-commercial educational stations. This means that as many as 10 educational stations can operate in every area, including large cities. Officials of the Office of Education say Station WHAS in Louisville, Ky.,

**HERO REMEMBERED**—Three-year-old Jane Flynn of Washington places flowers on the grave of General of the Armies John J. Pershing in Arlington National Cemetery (Nov. 11) Her father, J. Marshall Flynn, fought under Pershing in the first world war. (AP Wirephoto)

is making radio history by co-operating with the University of Louisville in broadcasting the first college course for credit ever offered by a standard broadcast station. Many other commercial stations offer some educational programs.

But only 34 standard stations are operated by educational institutions and only 20 non-commercial educational FM stations. Franklin Dunham of the radio section of the Office of Education says about 200 schools and colleges are planning to apply for FM licenses.

Iowa State College at Ames, Ia., is the only college with a television station in operation, but at least five others are planning to have stations soon. Because of expense, television sending stations may be beyond the reach of many schools and colleges. But Dunham says it may be possible to set up co-operation centers where a group of educational institutions would establish radio and television stations and produce educational movies. These programs and pictures would be available to all the educational institutions in the area.

## Chicago Is Seen As World Video Center

Chicago—AP—Chicago will have a population of 20 million people and will be the world center of all television broadcasting in the year 2048, claim Chicago news experts and city planners. Their prediction was sealed in an atom-bomb-proof "time-capsule" buried here at the site of Chicago's first depot by the Chicago and North Western Railway.

Burial of the capsule—which contains more than 500 photographs of railroading as it is today—marked the end of the first century of railroading in Chicago.

One radio commentator said he believed the Chicago of 2048 would be "vastly cleaner than it is now". Electrification through nuclear energy will reduce the use of coal mainly to . . . the production of steel," he wrote. "With soot virtually eradicated, the city will move toward washed buildings, swept streets, better garbage removal and more efficient street lighting".

The secret of cancer will, by 2048, "be infinitely simple to comprehend", according to another forecaster, and the only real threat to human life will be the "incurable bends suffered when pressurized cabins fail in space flight".

## Homemaker News

## Schedule

Nov. 19, 1:30 p.m., Bethany, Mrs. Elmer Jenkins, hostess.

Nov. 20, 7 p.m., Eddy Creek, Pay Social, Mrs. M. P. Brown, hostess.

Nov. 22, 1 p.m., Quinn, Mrs. Will Sigler, hostess.

Nov. 23, 1:30 p.m., Cobb, Mrs. Rudolph Morris, hostess.

Nov. 24, 1:30 p.m., Farmersville, Mrs. Richard Thompson, hostess.

Nov. 26, 2:30 p.m., Hopkinsville Rd., Mrs. Don Boitnott, hostess.

Nov. 20, 1:30 p.m., Eddy Creek, Mrs. Vernon Burgett, hostess.

## Hall

Hall Homemakers were shown how to pad a chair for slip cover when the club met with Mrs. Joe Horning, November 9.

Mrs. W. L. Littlefield presided at the business meeting. The club voted to put a road sign up for the Beech Grove General Baptist Church. Mrs. Joe Horning read Matthews 5, 13-16 for the devotion.

The thought for the month was given by Mrs. Joel Boitnott. Present were Mrs. A. R. Horning, Mrs. Mary Thompson, Mrs. Joel Boitnott, Mrs. W. L. Littlefield, Mrs. Joe Horning and Miss Wilma Vandiver.

## Lebanon

Lebanon Homemakers converted the living room of Mrs. M. C. Cartwright into a workshop during their regular meeting Friday night, Nov. 12.

All steps of the major lesson, "The Padding of Chairs For Slip Covers" were demonstrated as one chair was completely padded during the lesson. The minor lesson on "Legal Affairs" was given by Mrs. M. C. Cartwright.

Members present were Mesdames M. C. Cartwright, T. A. Ladd, George Markoff, James McGregor, Glenn Owen, Tillie Pickering, Clay Scott, Vernon Taylor, Pollard Thompson and Maurice Glass.

## Washington Letter

By Jane Eads

Washington—That plump bird we dish-up on festive occasions these days is not the same species our Pilgrim fathers shot and savored at the first Thanksgiving. Dr. Logan Bennett, chief of research of the Fish and Wildlife Service of the Department of the Interior, is authority for this.

He says the turkey on the market today originated from a Mexican bird. It was taken by the Spaniards to Spain, there domesticated and brought back to this country. "The wild turkey is different," Dr. Bennett told me. "It's much trimmer-built, more alert, longer-legged, runs faster, flies more readily—tastes better."

You have to be a real expert to catch a wild turkey. First of all, you have to have a turkey-caller. This is a box made of basswood, about 10 inches long with half-inch thick walls, the tops of which are thickly coated with chalk. Loosely attached to a screw at one end of the box is a 10-inch paddle of red cedar. As you move the paddle from side to side over the top edges of the box it sounds—like a turkey.

"You can't make your fake calls too often," he says, "because the wild turkey doesn't do a lot of calling. If you call too often you'll tip him off that you're not the real McCoy."

Dr. Bennett got his wild turkey last year on a mountain top in Pennsylvania. He started at 1:30 p.m., selecting a low spot in the brush where he lay quiet until the woods were still about him. Then he made three calls on his box. He waited 20 minutes, made two more calls. The turkey answered. "I didn't move an eyelash—wild turkeys have good eyesight," he said. "The turkey called two or three times, but I kept still until 2:10, when I made my next call, and waited until 2:30 to make another. The bird knew where I was. He made a call every few minutes trying to get me to answer."

At 2:45 Dr. Bennett made another call. The turkey answered, kept moving forward, until exactly at 3 p.m., when he got within 45 yards of his would-be assassin. "Then the bird couldn't stand it any longer," recited Dr. Bennett. "He broke into a fast run, as hard as he could go, right at me. I heard him coming, turned my head to look. Immediately he flew into the air at a right-angle. I reached for my gun, shot and killed him. We had turkey for Thanksgiving."

Dr. Bennett lives in a restored colonial home in Virginia, 35 miles from the capital, with his wife; a 13-year-old daughter who, like himself, trains bird dogs; and a son, nine, who possesses a beagle hound. The Bennetts also raise pigs and are getting ready to hunt their Thanksgiving turkey.

The phrase, "according to Hoyle", was first used to mean Edmond Hoyle, an Englishman of the 18th century who was the first to systematize the rules of whist.

## At The Churches

## FIRST CHRISTIAN

Tom W. Collins, Pastor

Evening services will be dismissed Sunday that the membership may continue their worshiping with the Methodists in their revival. The CYF will attend following the regular dinner meeting tonight and the evening program Sunday.

A growing interest is being shown by boys and young men of the church in developing two or more basketball teams. Two games have recently been played. Arthur Knox, Louard Egbert and Edward Dobbins will assist in coaching and managing the teams. Faithful attendance at services of the church will be required for eligibility to play.

Residents of Princeton without church affiliation are cordially invited to make First Christian their church home. Visitors are welcome.

## Land Produces Fruit

Herman Mitchell, who near Dixon in Webster county, has in less than eight years converted a practically worthless hill farm into one of the best fruit farms in Western Kentucky, is told by Farm Agent H. Ellis.

Mitchell bought his 130-acre farm in 1940. Through good management and use of lime, water and high grade mixed fertilizers, he has built up the soil until his farm this year netted him more than he paid for it originally.

Thirty acres of his orchard, or 2,100 trees varying in age from two to eight years, are in production at the present time. Mitchell estimates this year's crop of peaches at about 6,000 bushels, of which 1,400 bushels were harvested from 700 trees only two years old. Varieties in greatest number are Golden Jubilee, Hale Haven, South Haven, July Heath and Elberta.

Princeton, Ky.

## State Officials To Visit Parks

State officials and heads of the Kentucky Chamber of Commerce and the Kentucky Junior Chamber of Commerce will embark Monday on a three-day tour of several State parks to promote a livelier appreciation throughout Kentucky of the value of increased tourist travel.

Heading the party will be Lt. Gov. Lawrence W. Wetherby, State Chamber President B. J. Lethel, Louisville, and State Jaycee President Andrew W. Clark, Covington. Wetherby will represent Governor Earle C. Clements, who had to cancel plans to make the tour because of a knee ailment.

The tour will start with a noon luncheon meeting at the Talbott Tavern in Bardonia, followed by a visit to My Old Kentucky Home. The party will then motor to Cumberland Falls for the night, reaching there in time for dinner, and will leave Tuesday morning for Mammoth Cave. Wednesday night will be spent at Kentucky Lake.

Both the Dominican Republic and Spain claim to have the remains of Christopher Columbus buried within their borders. The earliest use of the phrase "almighty dollar" is attributed to Washington Irving in 1837. The Chicago fire in 1871 killed more than 200, made nearly 100,000 homeless, destroyed 17,450 buildings, and caused damage estimated at \$200,000,000.

**Recipe Of The Week**  
Of course there will be pumpkin pie for the Thanksgiving dinner! But for a delightful change, try this chiffon pumpkin pie recipe from the College of Agriculture and Home Economics, University of Kentucky. Salted nuts make a nice accompaniment.

**Chiffon Pumpkin Pie**  
1 tablespoon gelatin  
1/4 cup cold water  
3 egg yolks  
1/2 cup brown sugar  
1 1/2 cups cooked pumpkin  
1 teaspoon salt  
1/2 teaspoon ginger  
1/2 teaspoon cinnamon  
1/2 teaspoon nutmeg  
1/2 teaspoon vanilla  
3 egg whites  
1-3 cup white sugar  
Baked pie shell

Soak the gelatin in cold water. Beat egg yolks, add brown sugar, pumpkin, salt, spices, vanilla and milk. Cook in double boiler over hot water for about 10 minutes, stirring constantly. Remove from fire and add gelatin. Stir until melted, then cool. Beat egg whites until foamy, then gradually add white sugar. Beat until stiff. Fold into cold pumpkin mixture and pour into baked pie shell or six individual pie shells. Let set in refrigerator for three to four hours. Serve with sweetened whipped cream.

The first regular transcontinental mail service by air began between New York and San Francisco in 1920.

Blue geese are gluttonous feeders. The young gorge so steadily they develop more rapidly than the young of other geese.

**Can Black-Draught Help Physical Fatigue?**  
Yes, Black-Draught may help physical fatigue if the only reason you have that listless feeling is because of constipation. Black-Draught, the friendly laxative, is usually prompt and thorough when taken as directed. It costs only a penny or less a dose. That's why it has been a best-seller with four generations. If you are troubled with such symptoms as loss of appetite, headache, upset stomach, flatulence, physical fatigue, sleeplessness, mental listlessness, bad breath — and if these symptoms are due only to constipation — then see what Black-Draught may do for you. Get a package today.

**IF ILLNESS COMES**  
Every time a pharmacist hands a patient a finished prescription he gives him the benefit of years of professional training. Your pharmacist has studied botany, physics, chemistry, biology, and associated subjects. Pharmacists are giving the public a highly specialized service. It is our sincere wish that you may never have illness in your home. But if you do, take advantage of our personal, confidential service. Bring your prescriptions to us.

The pup was named Skipper after one killed by a car last month. The boy, crippled since birth, is at the Children's Hospital Cerebral Palsy School. (AP Wirephoto)

## Ky. Farm News

C. L. Walker of Marshall county increased hay yields by at least 1,600 pounds an acre through the use of phosphate.

Approximately 60 acres of Kenland clover were harvested for seed in Christian county.

Mrs. R. C. Hays of Washington county has made between 45 and 50 pounds of yellow cheese since that lesson was given in the Springfield Homemakers Club.

A Daviess county dealer reports the sale of more than 40,000 pounds of vetch seed, most of it being bought by farmers in that county.

Boyle county farmers reached their goal of 1,000 acres of alfalfa seedlings in their spring and fall plantings.

Better poultry equipment is reported by Gallatin county homemakers who have installed community type nests in poultry houses.

Despite drought, a 1 1/2-acre field of ladino clover on the farm of Ernest Miller in Bullitt county furnished abundant pasture for five sows and 45 feeder pigs.

More than 40,000 pounds of vetch with grain have been sown as cover crops by Jessamine county farmers.

The 1948 fescue seed crop of 125,000 pounds in Ballard county was sold principally to local farmers to seed 10,000 acres.

New dairy routes established in Carter county have caused 50 percent more farmers to improve their dairy programs.

H. C. Campbell of Perry county markets about 50 dozen eggs each week in Hazard.

A ton-litter of hogs by Helm Bros. of Marion county weighed 2,650 pounds when 175 days old.

From 75 to 100 bushels of corn to the acre are reported from most of the better farms in Hancock county.

The first free public bath in this country was established in Chicago in 1904.

Brick was first made in America in Virginia, in 1612.

America's first cast-iron bridge was built over the Erie Canal at Frankfort, N. Y., in 1840.

Diphtheria germs were discovered in 1883.

Baltimore, in 1821, was the first American city to use gas for street lighting.

## Pleasant Grove

By Miss Nola Wilson

Farmers are working this tobacco season; a great deal of it is going to market awaiting the opening sales.

Mr. Lethel Woolf is the first one we know to kill a hog.

Mrs. Zettie Woolf's condition is slightly improved.

Mr. and Mrs. Dewey Fletcher recently visited Mr. and Mrs. O. W. Dunning.

Mrs. Vesta Storms, of Colorado, recently visited her parents.

W. M. S. met November 11, with Mesdames Ernest Lacy, Otho Morris, L. W. Rogers, Leslie Ladd and Willie Glenn Herndon. Mrs. Isaac McCormick was added as a new member, and one visitor, Mrs. C. R. Overbey, was present.

Prayer meeting, conducted by Mr. Leslie Ladd, Wednesday, had several present.

Sunday School Sunday had an attendance of 56.

Mr. and Mrs. Claud Rogers are the proud parents of a new daughter.

Mrs. Merl Keller underwent an operation at Jennie Stewart Memorial Hospital Thursday. We wish her a speedy recovery.

Mr. and Mrs. Herby Rogers and children of Hopkinsville, Mr. and Mrs. Clint Ladd and Mrs. Zora Wilson recently visited Mrs. Annie Rogers and family.

## On a Ford Truck 14 Tons of Hay Ain't Hay!

Howard Gleisner of Oberlin, Ohio, stands alongside the 145-horsepower Ford F-7 Bonus Built Truck loaded with 347 bales of hay. "I will match this truck against any truck of equal size and weight," he says.

"I'm willing and eager to match my Ford F-7 BIG JOB against any driver of any make truck of equal size and weight," says Howard Gleisner of Oberlin, Ohio. "During the past ten years I've driven a lot of different makes of trucks but this Ford BIG JOB has proved tops over all in comfort, economy and performance."

Howard has a perfect right to be proud of his new Bonus Built F-7. It packs a 145-horsepower wallop which would stand it in good stead in a clash with any contender.

Lots of Ford Truck users are busting with pride. Why? Because Ford Trucks cut costs! Because Ford Trucks save money! Because Ford Trucks last longer! So, why not let them work and save for you?

Choose from over 139 Ford Bonus Built Trucks. Take your pick of 3 new engines. Only Ford offers a choice of L-head or V-8 engine design. Only Ford offers a Gyro-Grip clutch. Only Ford offers demountable brake drums. Only Ford has Level Action suspension of a big new cab. Only Ford lasts so long. Fact is, Ford's the "only-est" truck on the road.

Come in and try on a hatful of these, and many other features available in Ford Trucks only!

Your Ford Dealer invites you to listen to the Fred Allen Show, Sunday Evenings—NBC network. Listen to the Ford Theater, Friday Evenings—CBS network. See your newspaper for time and station.

## Civic Clubs Are Lending Aid To Roadside Parks

Engineer Outlines Requirements For Sites, Pledges Maintenance And Policing

Pikeville — Kentucky civic clubs are definitely interested in cooperating with the Department of Highways in its current program to place roadside parks along main-traveled highways. The State roadside improvement engineer, J. P. Shannon, said here today.

"The response to the department's recent call for aid in the acquisition of land for park sites is encouraging," Shannon told the Pikeville Kiwanis Club. "I have already received letters from civic clubs and chambers of commerce indicating their interest in our program."

Shannon suggested recently that Kentucky follow the lead of other states in encouraging garden clubs and other civic groups and individuals to donate land for park sites.

"It is important for these groups to know what requirements a site must meet in order to be suitable for taking over as a roadside park," Shannon said.

"First of all, the site must be a safe location with plenty of sight distance in all directions. It should not be on a dangerous curve or bad grade. Secondly, topography of the site should lend itself to a park. No expensive grading should be necessary and a level site permits easier

## 'The Queen's Thanksgiving' Given By Dotson Pupils

A play, "The Queen's Thanksgiving", will be presented Tuesday night, Nov. 23, at 8 o'clock by third and fourth grade pupils at Dotson School, J. P. Griffey, principal, announced. Friday night, Nov. 19, a music recital sponsored by the P. T. A. will be given in the auditorium, while P. T. A. of Trenton will present a concert, Wednesday, Dec. 1, in the Dotson Auditorium, sponsored by the Dotson P. T. A., Mr. Griffey said.

Use especially by older visitors who should not have to climb many steps.

"There should be plenty of shade trees and where possible, a good view or some other interesting feature. We should like to provide roadside park facilities at overlook sites and other scenic points where possible. In the selection of a site for a roadside park, there should be no logical objection raised by adjoining property owners to the use for this purpose. There should also be no evidence that neighboring conditions would tend to permit misuse of the park."

Shannon said the department hopes to have several new park sites ready for use by spring and added once the parks are developed, they will be properly maintained and policed.

"As a service to the traveling public, these parks will be provided with adequate parking areas, toilet facilities, safe drinking water, picnic tables and grills."

The first artificial ice plant was established in New Orleans in 1866.

## In Massachusetts

Rct. Darrel Dearing, 19, son of Mr. and Mrs. Carl Dearing, Route 5, is a graduate of Fredonia High School. He entered the Army in September and is taking basic training at Fort Devens, Mass.

## Hunting Season

(Continued From Page One) conservation officers of the Division throughout the state.

In addition to the quail and rabbit season a 15-day open season has been declared on grouse or native pheasant this year. The season will open December 1 and continue through December 15, with a bag limit of two a day, the division reports. The season on ducks and geese opens at noon December 10, and continues through January 8, with a limit of four each day and a possession limit of eight ducks after the first day. Possession limit for geese is eight. Shooting hours for the first day are from half an hour before sunrise to one hour before sunset, except on the first day when the hours are from noon until one hour before sunset. Included in the bag limit or possession limit shall be not more than one wood duck, or two Canada geese or subspecies, or two white-fronted geese, or one of each.

The deer season in five Kentucky counties, Nelson, Hardin, Breckinridge, Meade and Bullitt, will open November 27, and continue through December 4. Only antlered buck deer may be taken and only shotguns, loaded with slugs or 00 buckshot may be used. In addition to the regular statewide hunting license a special deer hunting permit, which costs \$5, is required.

Barn Attracts Attention A stock barn with a gambrel roof is causing considerable interest in Menifee county, where it is the only one of its kind. It was built by S. B. Smith of the Tar Ridge community, who obtained the blueprints from the agricultural engineering department of the College of Agriculture and Home Economics, University of Kentucky. Mr. Smith is pleased that he will be able to store his hay without loss from outside stacking.

During World War II, the U. S. Navy for the first time, had more installed diesel power than steam power.

## Early Buyer Gets That Yule Bird

By Cynthia Lowry

There are a few obnoxious people around these days: the foresighted types who have their Christmas shopping done before there's even frost on the pumpkin.

Next to people who boast about how early they get up in the morning, they are my winter-season candidates for extinction. It's not so much that they've put the business of gift-buying behind them, it's the gentle, superior sort of way they go on. And the way they let you know right off the bat they haven't a worry in the Yuletide world except to fuss over a wreath for the front door and pick up some holly, and, darling, the holly this year seems sort of scrubby. All this when I'm in a star-spangled swivel about remembering whether Aunt Emma is allergic to wool and whether little Priscilla has gone out of the toy, and into the book, age.

There aren't many of them, thank goodness. But in the interests of my own self-esteem—I'm a last-minute shopper by nature—I recently surveyed those among my acquaintances who were all finished with Christmas shopping when I was fooling around with the idea of a Labor Day barbecue.

Every father's daughter among them went a-traveling this summer.

Maudie, with a three-day stop-over in Paris, walked among the Seine bookstalls, and picked up a gross of those quaint old maps of the Ville Lumiere.

Joannie, on that all-expense Mexican junket, bought out a Texaco shoppe which featured quaint old, made-in-Syracuse pottery.

And Pattie, on her something less than A Deck Caribbean cruise, came back with a formidable sunburn and loaded down to the duty-free line with perfume.

All this is very commendable, but it's not for me, thanks. Christmas shopping is different from any other kind of shopping. It should be done with spirit, at a time when there's a feel of winter in the air, fake Santas ringing bells on corners and crowds in the stores. There should be an urgency about it, a feeling of holiday in the heart and store windows full of tinsel and soap-chip snow.

Of course, if you're going to parcel out gifts from a stock-pile, as though you were issuing ammunition to a regiment, Maudie, Joannie and Pattie are pretty smart people. But that makes Christmas quite simply a day on which presents are meticulously swapped, not a day of giving. In that case, August mark-down sales are perfect times to pick up a couple of dozen tie-dyed scarfs for a song.

But that's not for me, I'll concede, however, there's a happy ground somewhere between the two. Like right this minute, even if I just start making a list. Ooops, \$5.37 in the bank and those organdy curtains for the living room coming C. O. D. Wednesday. Well, next year, I'll

RED ROLFE GETS HIS MANAGER'S UNIFORM — Billy Evans, (left), general manager of the Detroit Tigers hands a uniform to Robert (Red) Rolfe (Nov. 15) in Detroit, Mich., after the one-time New York Yankee third baseman was appointed manager of the Tigers. Rolfe, 40, served as director of Detroit's minor league system. (AP Wirephoto)
